

Item Types Plus Installation Guide

1. Run the Item Types Plus MSI included in the ZIP file with this document.
2. Copy the **ItemTypesPlus** folder provided in the zip file to your organization's DGNLIB folder
3. Copy the contents of the ItemTypesPlus.cfg file into your organization.cfg file.
(edit paths to variables as needed)

Item Types Plus should now be accessible. You will need to customize the Excel files in the ItemTypesPlus folder that was copied to your organization's location to customize for your needs. See CustomizationInstructions.docx in that folder for more details.
