3rd Party Application Notes:

1. The integration provided for AutoCAD-based AutoCAD verticals is the same as that provided for base AutoCAD; ProjectWise doesn't provide integration for the additional tools and commands unique to each vertical.
2. The Integration provided for AutoCAD Civil3d vertical has enhanced functionality. It is installed from the AutoCAD installer, there is no need for an additional install.
3. The Suite products use the same installer set as the individual products do.
4. Microsoft 365 integration is limited to installed applications. Integration doesn't work in click to run mode.
