RAM Elements- iTwin services

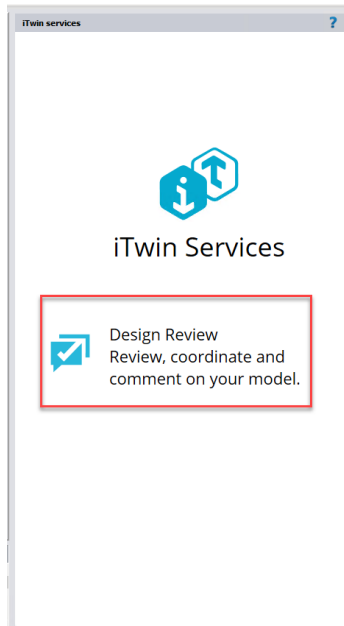

Design Review

Enable Design Review panel

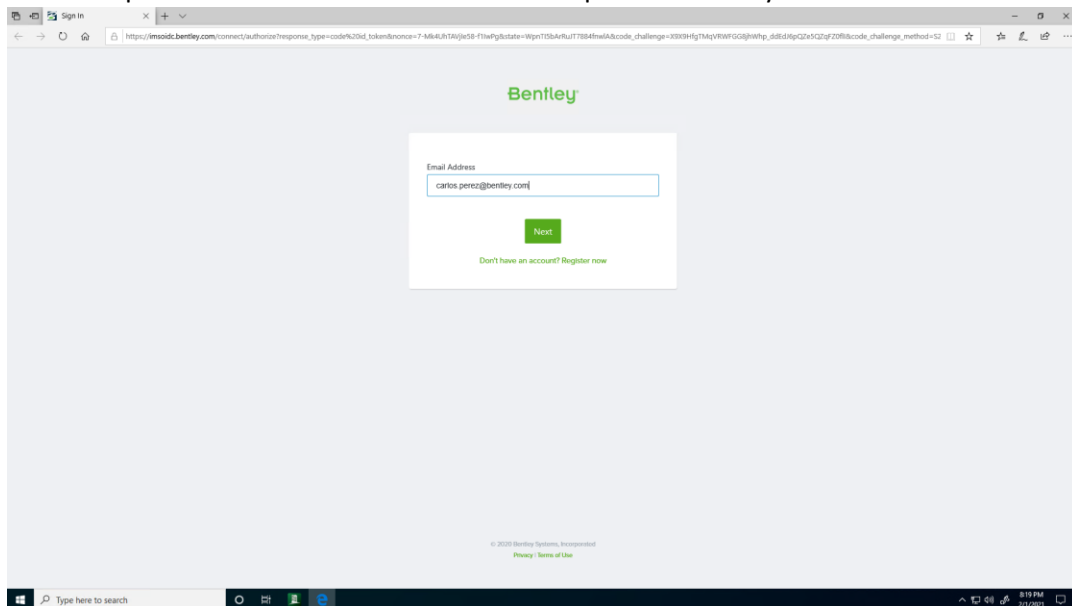

1. Enable the iTwin services panel. This is done using the button in the iTwin group located in the Home tab.

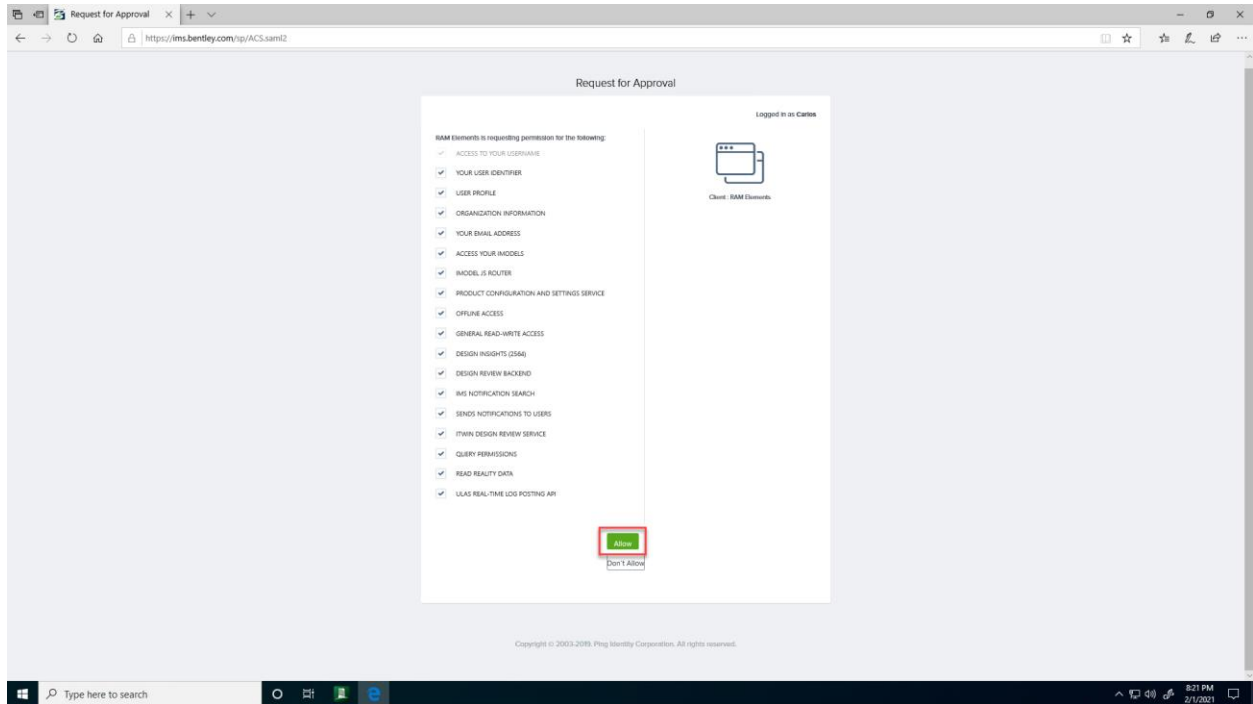

2. Once in the iTwin Services panel click the Design Review option in the panel.

3. This will open the default browser where is it required to enter your credentials.

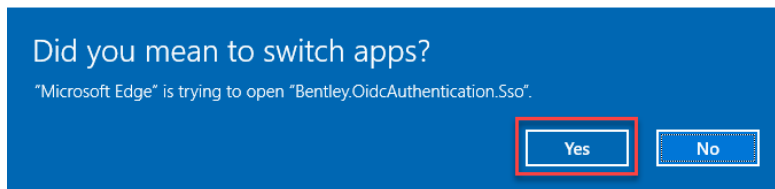

4. Then you need to set the permission for RAM Elements to perform the required actions for Design Review. Leave the defaults and press Allow.

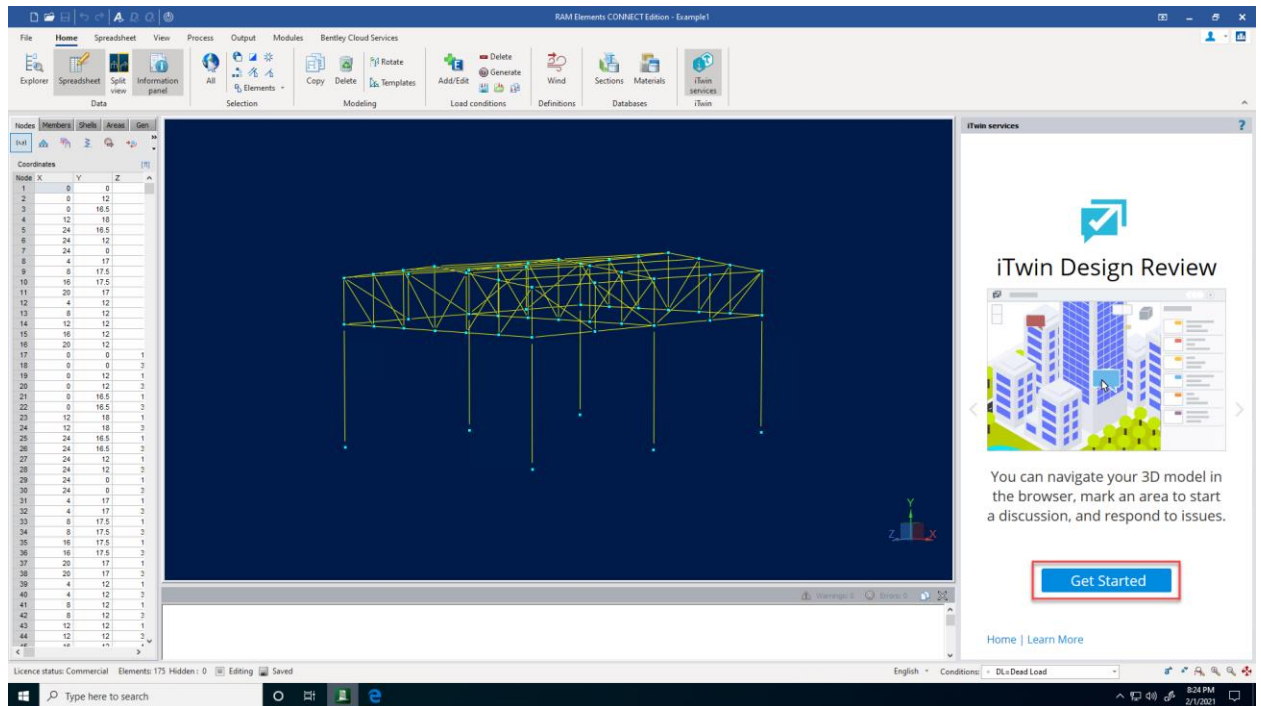

5. This switch to the authenticator, if a message appears please select YES.

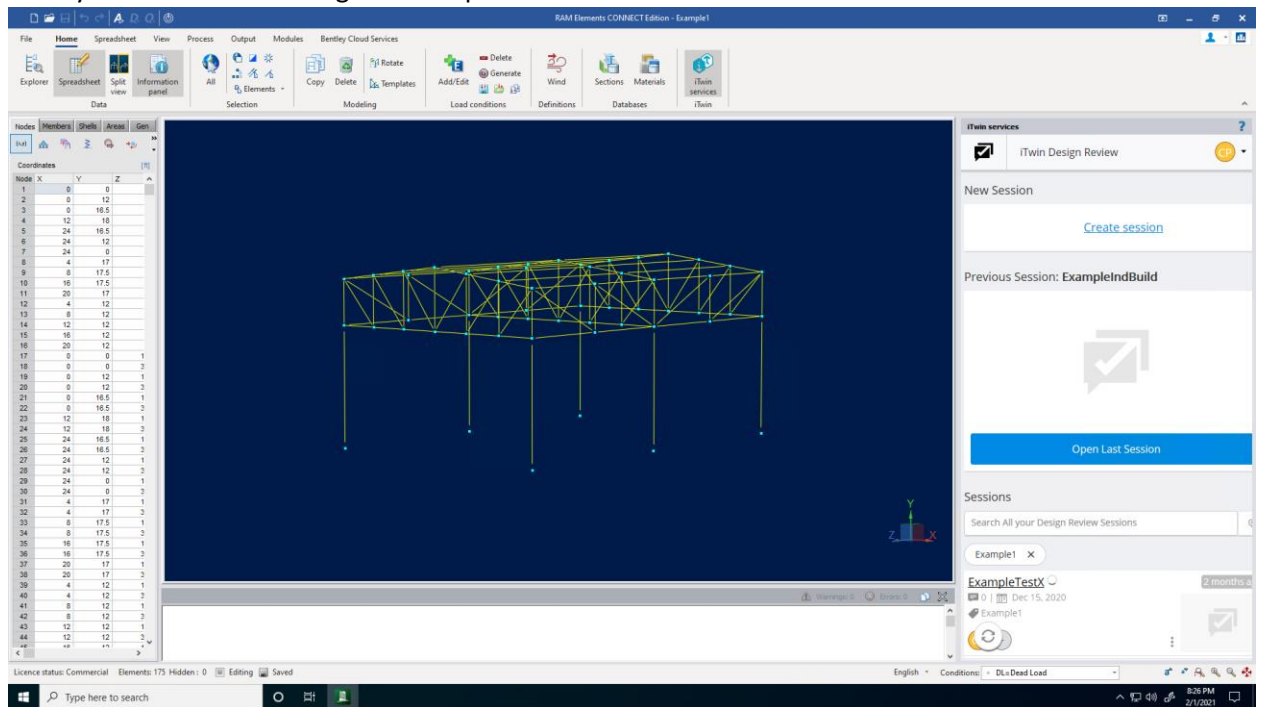

Did you mean to switch apps?

6. Return to RAM Elements and then you can Get Started.

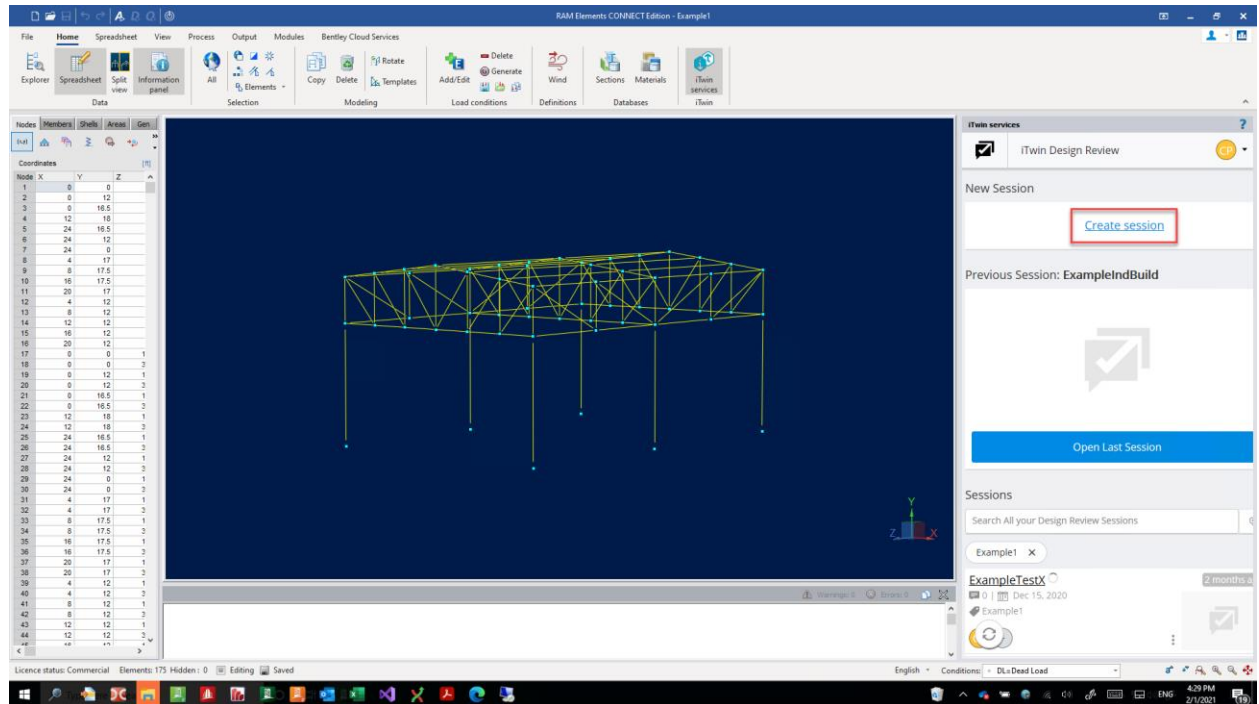

7. Then you will be in the Design Review panel.

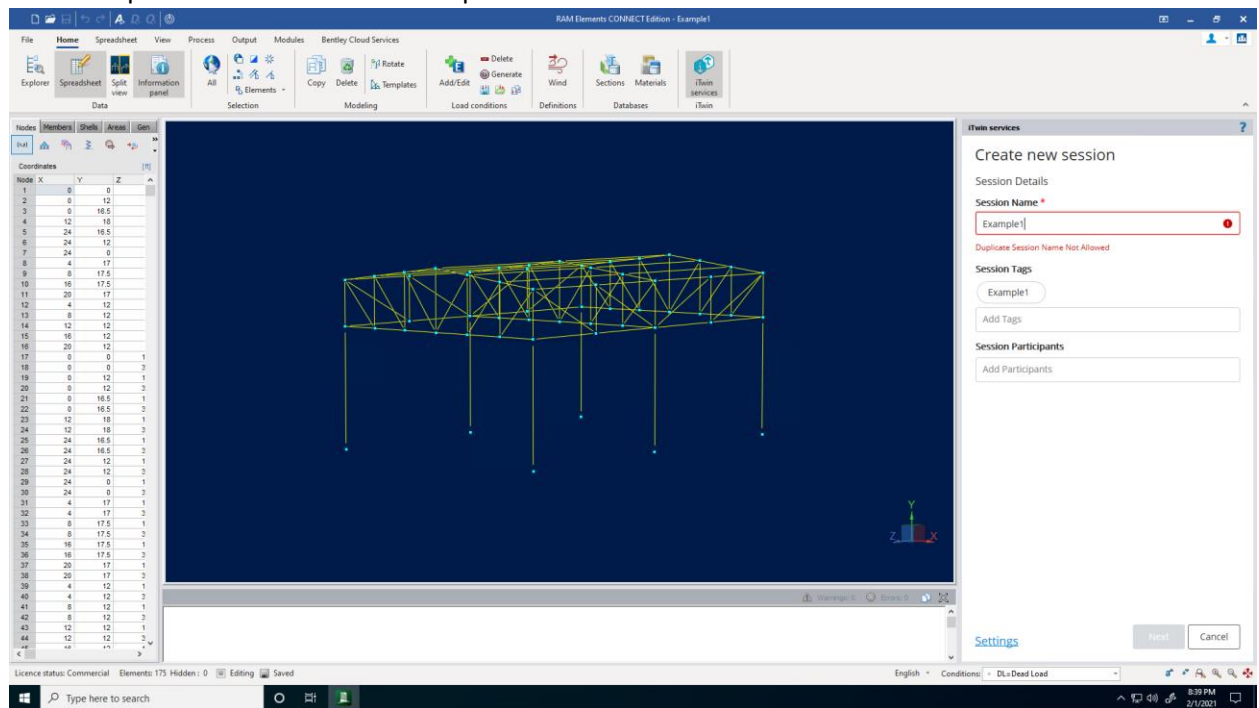

Create a new session

Let's create a new Design Review session using Example1.retx.

1. Once in the Design Review panel, open the model Example1.retx that will be used to create a new session then press the Create session link.

2. This will open the Create new session panel as follows.

3. To Create a new session is required a session name and optionally you might set tags and participants. The tags will be used to help you look for the session and the participants are the people that will have access and participate. Once all this info is set then press next.

4. This will create a new session with the options by default. This could take some minutes.

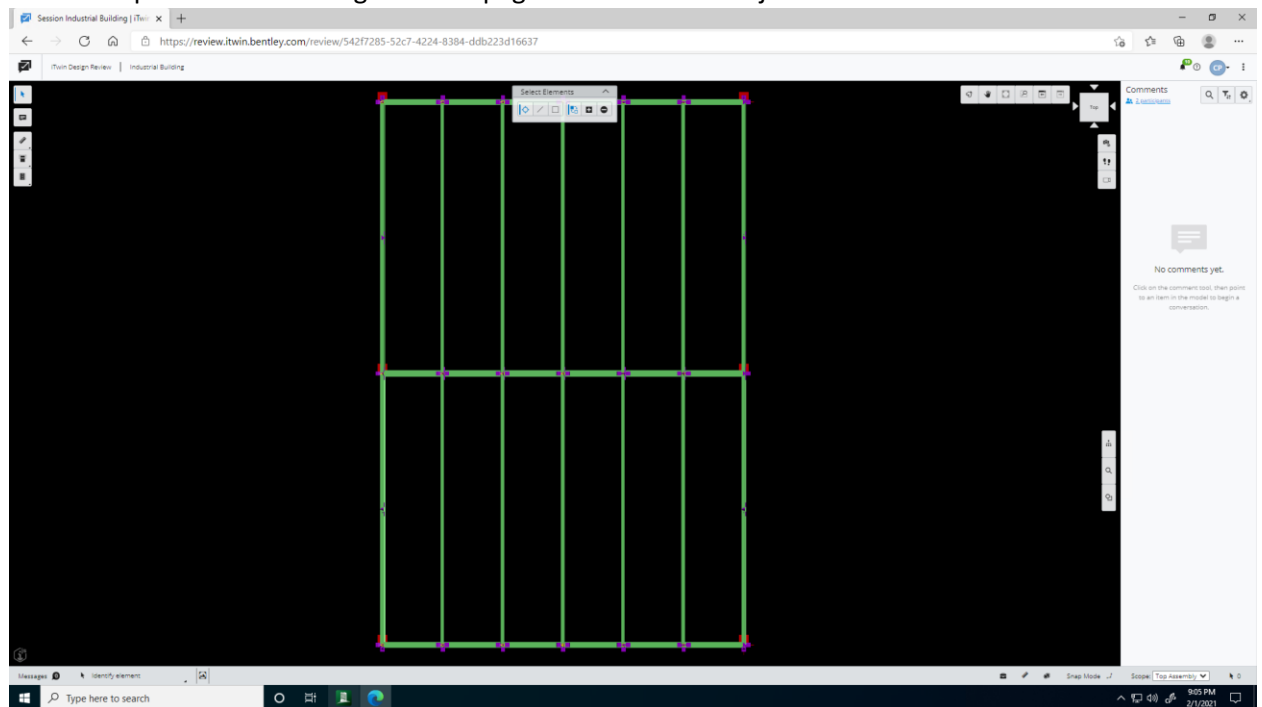

5. Once the session is completed, you will be notified as follows

6. In order to launch the session, click the title as follows.

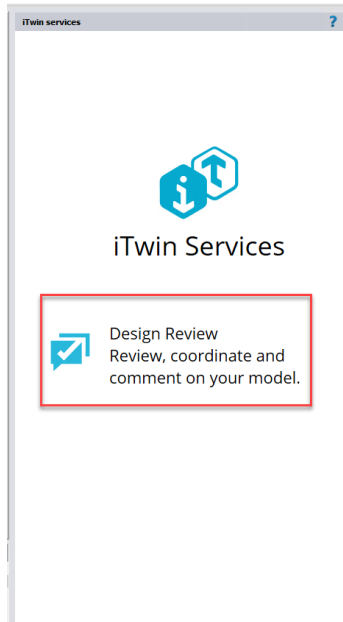

7. This will open the iTwin Design Review page for the model we just created.

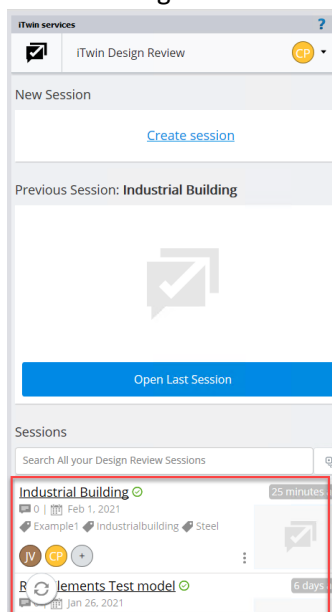

Open an existing session

Let's open an existing Design Review session

1. After enabling the iTwin services panel. Click the Design Review button.

2. This will automatically log you into Design Review as your credentials are already saved, if not the credentials need to be entered once more.
3. In the iTwin services Design Review panel you will see all your previous sessions at the bottom. You can navigate down using the wheel.

4. Click in the required the session and that will again take you to the iTwins Design Review page.
